#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 06 February 2006.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 7-9, 11, 14, 15, 19-21, 31, 32, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by FR 2303711.

FR 2303711 discloses having an arcuate structure wherein the archway has u-shaped cross-section that has components running through it. See page 3, lines 34-page 4, line 10 and figures 3 and 4.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17, 18, 22-24, 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Norris in view of Robillard et al.

FR 2303711 discloses all claimed parts including the archway being hollow but is silent on the system components that run through the hollow archway so that instruments from the

Art Unit: 3644

lower portion and upper crown portion can communicate with each others. However, Norris is silent on the system components running through his hollow archway. Robillard et al teaches that system components that run thru a hollow passageway of an aircraft is well known in the art (see figure 2).

It would have been obvious to one skilled in the art at the time the invention was made to have ran system components through FR 2303711' hollow archways as taught by Robillard et al to accommodate the passengers. Please note that the use of support system components in the upper and lower lobe portions are well known in this day and age. Plus it is obvious to one skilled in the arts to use support components in the upper and lower portion to accommodate the passengers.

Please note that to make a passageway integral merely involves a routine step that one skilled in the art would have taken.

Re claims 22-23, please note that the archway can be used as a divider since a person skilled in the art would put a marker in the archway to designate one end as the front and the other end as the back. Thus an archway that runs through the fuselage would divide the portions of the aircraft into different portions.

***Allowable Subject Matter***

Claims 5, 6, 12, 13, 25, 26, 35, and 36 are allowed.

***Conclusion***

Art Unit: 3644

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Please note that since applicant has submitted an IDS after final, the Examiner has to consider it since applicant has met the requirements. The new arts requires the Examiner to reject the amended claims.

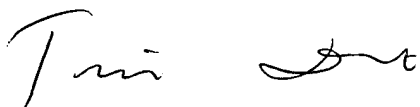

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tien Dinh whose telephone number is 571-272-6899. The examiner can normally be reached on 9-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on 571-272-7045. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
